Wonde is a data management system for the Education Sector which Saltersgate Junior School uses to set up free school meal vouchers. Wonde extracts data (i.e. student, teacher and parent records) from within the school, stores it in the cloud and then provides third party applications access. This ensures they are compliant with their data protection obligations.

If you would like further information or reassurance regarding their procedures, please visit the link below which will take you to their Data Protection Policy.
